

Cluster RCT sample size

Number of schools per arm:

Number of schools per arm (for table)

45, 50, 55

Average size of cluster

75

Attrition at school level

0.15

Attrition at individual level

0.2

Intra-cluster correlation

0.2

Significance level

0.05

Power

0.8

Correlation between baseline and follow-up (Random effects model only)

0.5

Output
